Who makes 500 watt solar panels?

At the time of publishing, only a handful of solar companies offer 500-watt panels, including JinkoSolar, Trina Solar and a few international manufacturers. However, many other brands sell "500-watt solar panel kits," which are actually just multiple lower-wattage devices bundled together.

Are 500 watt bifacial solar panels a good choice?

A small array of 500-watt panels can easily supply enough power to run a residence or business, and because ground-mounted arrays can work well in open fields, large installations of 500-watt bifacial solar panels are well suited to running entire communities.

How many Watts Does a 500 watt solar panel produce?

Although the average daily production for a 500-watt solar panel is around 2,000 watt-hours, you're better off with a 3,000-watt-hour battery or larger -- it's usually a good idea to have a little more battery capacity than you think you'll need.
