Will price fluctuations affect the photovoltaic module market?

As the global energy transition accelerates, the photovoltaic (PV) industry, as a key component of renewable energy, continues to attract significant attention for its promising development prospects. However, price fluctuations in the photovoltaic module market remain a critical factor influencing the industry's growth.

How are photovoltaic module price adjustments affecting industry players?

The current round of photovoltaic module price adjustments has imposed significant operational pressure on industry players. Leading companies, with their high R&D costs, are at a disadvantage in the price competition. Meanwhile, small and medium-sized enterprises find it challenging to endure prolonged price wars.

How much will PV modules cost in 2025?

International PV module prices, driven by Chinese averages, will likely rise from \$0.08/W to \$0.10/W today to \$0.11/W by the end of 2025 and potentially \$0.13/W by 2027, says Clean Energy Associates (CEA), noting that heterojunction and back-contact technologies now make up 12% of global module capacity.

How much does a PV module cost in China?

According to price analysis firm InfoLink: "Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark." The results of the China Datang Group's 2025-2026 PV module framework. Image: Datang.

What factors affect the cost of photovoltaic modules?

1. Cost Factors Driving Price Fluctuations The cost of photovoltaic modules is primarily composed of solar cells, glass, encapsulation film, and labor expenses.

Which solar module manufacturers have announced price hikes?

Following this, LONGi also declared that the prices of its B-type modules would rise by 1-2 cents, effective October 29. Additionally, reliable sources indicate that Tongwei Solar, Jinko Solar, and JA Solar will also increase their prices by CNY 1-3 cents. This means that all top five solar module manufacturers have announced price hikes.

After months of declining prices, January marked a turning point in the European solar market, with module prices experiencing a slight rebound. ...

Notice of Photovoltaic Module Price Adjustment

The current situation in the PV module supply chain mirrors the previous price increase cycles, leaving sales personnel in a dilemma.

Tongwei responded by stating that the company's module prices are expected to rise, but the specific magnitude of the price increase cannot ...

The current round of photovoltaic module price adjustments has imposed significant operational pressure on industry players. Leading companies, with their high R&D ...

Solar module prices in the United States rose for the first time since summer, according to an Anza report, driven by tariff adjustments and ...

A recent Wood Mackenzie report examines two possible tariff scenarios and concludes that costs will skyrocket for both utility-scale solar ...

As for the module price trend, Chen Guo of the CEIBS Ruibo Research Institute told the Financial Associated Press reporter that the module price bottoming out signal is ...

Why are PV module prices falling? Photovoltaic (PV) module prices are a key metric for PV project development and growth of the PV industry. The general trend of global ...

On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n ...

In a new weekly update for pv magazine, OPIS, a Dow Jones company, reports that TOPCon modules from China held steady at ...

The European PV market closed 2024 on a resilient note despite slight seasonal adjustments. The December edition of the PV Index of ...

China has announced significant changes to its export tax rebate policies, effective from December 1, impacting various industries, including photovoltaic (PV) products. In a joint ...

On February 9, 2025, China's National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) jointly issued the Notice on Deepening ...

Once the installation rush is over, demand may fall sharply by Q2 2025. Prices will also drop to CNY 0.70/W or even lower with intense ...

China has reduced the export tax rebate for solar products, lowering refunded taxes for Chinese PV exporters

and eating into their profit ...
