What is a 'uninterruptible power supply' in South Africa?

The Uninterruptible Power Supply (UPS) has quickly become part-and-parcel of life in South Africa. Since the first announcement of 'load shedding' in 2008, UPS systems have been adopted into many households. The devices protect valuable electronics from electrical surge/outage damage and have saved families from countless headaches.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) offers guaranteed power protection for connected electronics. When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment.

Do you need a double conversion UPS system in South Africa?

DC (battery power) supports inverters, which could include flywheels or batteries. As South African consumers, we need efficient power protection. This is from the inconsistent power conditions we so often face. A double conversion UPS system offers you just that. It is an efficient backup when the power goes out.

What are the best uninterruptible power supplies?

Uninterruptible power supplies (UPS) are valuable tools to prevent loss of work and damage to electronics due to load-shedding, and the best brands include Mecer, RCT, and Eaton. Each brand offers a range of UPS sizes that give users time to save work and safely shut down their electronics when Eskom cuts power.

Who is the best ups supplier in Johannesburg?
